

NITIN ASI

Data Science & Generative AI Engineer

nithinasi005@gmail.com | 6309810327 | Srikakulam | github.com/asi-nithin | linkedin.com/in/nithin-asi

PROFESSIONAL SUMMARY

Aspiring Data Science and Generative AI Engineer with a strong foundation in Python, statistics, and machine learning, and hands-on experience applying Data Analysis, EDA, and ML model evaluation to real-world problems. Skilled in building Generative AI and LLM-powered applications using LangChain, LangGraph, RAG, Hugging Face Transformers, and prompt engineering, alongside classical ML workflows using Pandas, NumPy, and Scikit-learn. Experienced in developing AI assistants, predictive models, and intelligent automation systems using Python, FastAPI, and Streamlit, with a passion for combining data-driven insight and applied AI to deliver scalable solutions.

TECHNICAL SKILLS

- **Programming & Data:** Python; Statistics (Hypothesis Testing, Probability); SQL (SQLite, MySQL)
- **Data Analysis:** NumPy, Pandas, Scikit-learn, Excel, Exploratory Data Analysis (EDA), Machine Learning Model Evaluation
- **AI / ML:** Machine Learning, Deep Learning, Natural Language Processing, Generative AI, CrewAI
- **Generative AI & LLM Frameworks:** Generative AI & LLMs, Prompt Engineering, RAG, LangChain, LangGraph, Hugging Face Transformers, Ollama
- **ML Frameworks:** TensorFlow, PyTorch
- **Data Visualization:** Matplotlib, Seaborn, Power BI, Tableau
- **Databases & Deployment:** FAISS, Chroma DB (vector stores); Streamlit, FastAPI, Flask (deployment)
- **Tools & Collaboration:** Jupyter Notebook, VS Code, Git, GitHub

PROJECTS

Machine Learning-Based Disease Prediction System

- Built a disease prediction application in Python and Streamlit using a Logistic Regression model to identify likely diseases from user-reported symptoms.
- Performed data cleaning, EDA, and feature preparation with Pandas and NumPy, then evaluated the model on accuracy, achieving 92% predictive accuracy for reliable healthcare decision support.
- Integrated personalized recommendations (precautions, diet, medication guidance) based on model output.
- Designed an interactive, real-time Streamlit interface for symptom input and prediction results.

AI Interview Preparation Copilot

- Built an end-to-end Generative AI application using Python, FastAPI, Streamlit, LangChain-style orchestration, Llama 3.2, and Google Gemini for interview readiness, applying prompt engineering throughout.
- Developed resume analysis, mock HR/coding interviews, and automated question generation using LLMs and NLP techniques.
- Implemented AI-driven answer evaluation with structured JSON outputs and real-time performance tracking, applying model evaluation logic to score responses and surface actionable feedback.
- Designed a dual-LLM, RAG-ready architecture with runtime model switching for flexible, scalable AI workflows.

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering

Oct 2022 – Apr 2025

Sri Sivani College of Engineering, Srikakulam | CGPA: 7.02 | Coursework and self-study in Data Science, Statistics, and Machine Learning

Diploma, Electronics and Communication Engineering

Jul 2019 – Apr 2022

Sanketika Polytechnic College, Visakhapatnam | CGPA: 8.25

SSC

Mar 2019

Z.P.H. School, Rajapuram | CGPA: 8.7

CERTIFICATES

- Python Essentials 1 & 2 — CISCO
- Pandas, Machine Learning, SQL — Kaggle
- HTML, CSS, JavaScript (Basic) — Rugvedha Technologies Pvt Ltd

ACHIEVEMENTS

- 2nd Place, Diploma-College Chess Championship — Sanketika Polytechnic College, Visakhapatnam (2022)
- College Fest Coordinator — managed event execution and cross-functional team collaboration
- Captained village cricket team, demonstrating leadership and decision-making under pressure

Personal Skills: Teamwork & Time Management • Problem-Solving • Analytical Thinking • Adaptability • Hardworking
