PROFESSIONAL SUMMARY

AI & ML Engineer skilled in developing and deploying Machine Learning, Deep Learning, and Generative AI solutions using Python, TensorFlow, and PyTorch. Experienced in building LLM- and RAG-based applications with LangChain, LangGraph, and vector databases such as FAISS and ChromaDB, and deploying AI applications using FastAPI and Streamlit. Strong foundation in statistics and data visualization, with a focus on developing scalable, real-world AI solutions.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Data Analysis:** NumPy, Pandas, Scikit-learn, Excel, Exploratory Data Analysis (EDA)
- **Statistics:** Probability, Hypothesis Testing, Statistical Inference
- **Machine Learning & Deep Learning:** Machine Learning (ML), Deep Learning (DL), TensorFlow, PyTorch, XGBoost
- **Artificial Intelligence:** Natural Language Processing (NLP), Generative AI (GenAI), Multi-Agent Systems (CrewAI)
- **LLM & AI Frameworks:** RAG, LangChain, LangGraph, Ollama, Hugging Face Transformers, Prompt Engineering
- **Data Visualization:** Matplotlib, Seaborn, Power BI, Tableau
- **Cloud & Deployment:** FastAPI, Flask, Streamlit, Docker
- **Databases & Vector Stores:** SQLite, MySQL, FAISS, ChromaDB, Pinecone
- **Tools & Platforms:** Jupyter Notebook, VS Code, Git, GitHub

PROJECTS

Machine Learning-Based Disease Prediction System ■

- Developed a disease prediction system using **Python, Streamlit, and Logistic Regression** to predict possible diseases based on user-provided symptoms.
- Achieved **92% prediction accuracy** through model training and evaluation, with personalized precautions and dietary recommendations.
- Designed an **interactive and user-friendly Streamlit interface** for real-time symptom analysis and disease prediction.

AI Interview Preparation Copilot ■

- Built an **AI-powered Interview Preparation Copilot** using Python, FastAPI, Streamlit, Llama 3.2, and Google Gemini for end-to-end interview preparation.
- Developed **resume analysis, mock HR/coding interviews, automated question generation, and AI-based answer evaluation** using LLMs and NLP techniques.
- Implemented a **dual-LLM architecture with runtime model switching**, structured JSON outputs, and real-time performance tracking for actionable feedback.

AI Stock Research & Intelligence Platform ■

- Built a **multi-agent AI Stock Research & Intelligence Platform** using LangGraph, FastAPI, Streamlit, Gemini, and Groq for comprehensive stock analysis.
- Developed specialized agents for **news, financials, technicals, risk, valuation, and peer comparison**, generating buy/sell recommendations with confidence scores.
- Implemented **live market data, portfolio analysis, screening, AI chat, technical visualizations, Monte Carlo simulation**, and automated PDF research reports.

EDUCATION

Bachelor of Electronics and Communication Engineering,

Sri Sivani College of Engineering

CGPA: 7.02

Oct 2022 – Apr 2025

Srikakulam

Diploma - Electronics and Communication Engineering,

Sanketika Polytechnic College

CGPA: 8.25

Jul 2019 – Apr 2022

Visakhapatnam

SSC

Z.P.H.School

CGPA: 8.7

Mar 2019

Rajapuram

CERTIFICATES

- **Foundation: Introduction to LangChain - Python** — LangChain Academy (ID: 5dgafuzq mz)
- **Python (Basic) Skill Certification** — HackerRank (ID: 2883B4F723E2)
- **Pandas, Intro to Machine Learning & Python** — Kaggle Certificates
- **Python Essentials 1 & 2** — Cisco
- **HTML, CSS & JavaScript (Basic)** — Rugvedha Technologies Pvt. Ltd.
